

Brain Hat

Kit contains 2 brain hemispheres.
You will need scissors and clear tape.

INSTRUCTIONS

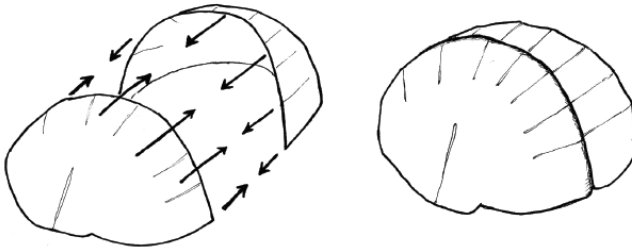

Step 1. Cut out the brain pieces.

Step 2. Cut on the solid lines as indicated.

Step 3. Tuck the flaps under until the dashed line meets the solid line, and then tape in place.

Step 4. Tape the hemispheres together to form a hat.

Step 5. Tape the cerebellum to the bottom of your brain hat below the occipital lobe.

USE YOUR BRAIN [HAT]

In addition to being a fashion statement, your brain hat helps you learn how your brain works.

1. Which part of your brain interprets smell?
2. Which part of your brain interprets sight in your left eye?
3. Which part of your brain moves the right side of your body?
4. Which part of your brain forms sentences?
5. Which part of your brain is responsible for muscle memory?
6. What does your parietal lobe do?
7. What does your sensory cortex do?
8. How is the left half of your frontal lobe different from the right half of your frontal lobe?
9. What parts of your brain would you need to invent an awesome dance to your favorite song?
10. What parts of your brain would you need to cook your favorite food?

**Brain hats
are cool!**
